Intelligent Well Systems

INFORCE™ HYDRAULIC SYSTEM

INCHARGE™ ELECTRIC SYSTEM

Creating Value:

- Increased Ultimate Recovery
- Reduced Overall CAPEX and OPEX
- Accelerated Production
- Reduced Intervention

Baker Oil Tools Expandable Systems

EXPress™ Expandable Screen System

- Enhances sand control and wellbore stability and longevity
- Improves water control in open hole
- Superior particle holding capacity and exceptional burst, collapse and crush resistance
- Unique filter membrane construction allows conditioned mud solids to be produced without plugging the screen

EXPatch™ Expandable Casing Cladding

- Isolates perforations to shut off water in cased-hole completions
- Repairs damaged or corroded casing
- Creates definitive mechanical fluid flow barrier in sand control completions
- Provides metal-to-metal patch with minimal or zero annulus
- Cladding length can be adjusted to fit application
- Sealing mechanism does not rely on integrity of surrounding medium

linEXX™ Expandable Liner System

- Effectively isolates problem drilling zones without reducing casing ID
- Foundation for monobore wells with one size of casing from surface to reservoir
- Can be used for unexpected problems, as part of initial well design or in contingency situations
- Can be used as production liner in cased hole

drillEXX™ Open-Hole Drilling Liner

- Selectively isolates lost-fluid and unstable zones in open hole without reducing casing ID
- Stand-alone capability – not tied back to casing string
- Works with standard bit sizes
- Can be used with Hughes Christensen hydraulically activated Concentric Expandable Reamer to eliminate an underreaming trip
