

# Pipeline Data Management Solutions

## From Baker Hughes Pipeline Management Group

With the recent acquisition of Baseline Technologies, Inc., Baker Hughes PMG now offers Best-in-Class products and services to integrate and manage pipeline data. Using our proprietary Pipeline Information Control System (PICS)<sup>SM</sup> services, our experts deliver:

- Integration of all pipeline data (including CIS) in a spatially accurate model
- An efficient and accurate change management process
- Measurably better management of ILI and direct assessment data
- Reduced data management and corrective action time lines
- Enhanced dig program efficiency
- Reduced maintenance costs through better informed decisions
- Streamlined and documented regulatory compliance

Our Data Management Solutions add value to existing GIS and data management systems and provide the following advantages:

- Scalability – single line to system-wide implementation
- Ease of integration – reduced time and cost to realize measurable benefits
- Open architecture – data centric design, including a completely configurable risk calculation engine
